

GPSS

Ignite your soul, not the Earth.

November 4th, 2020

GPSS Group will participate to
“The 15th World Renewable Energy Exhibition & Forum Exhibit”
9th,10th and 11th of December 2020
Tokyo Big Sight

This year, the 15th World Renewable Energy Exhibition & Forum will be held in Tokyo Big Sight, for 3 days (9th, 10th, and 11th of December 2020).

Every year, this exhibition, organized by the Renewable Energy Council, brings together key domestic and international stakeholders related to the renewable energy field, introduces the latest technologies, and shows the latest information on the innovation and future of renewable energy from Japan.

This year's "15th Renewable Energy World Exhibition & Forum" will be held at the same time as the "45th Global Environment and Energy Harmony Exhibition (ENEX2021)" and "Distributed Energy and Digital Technology Fusion Exhibition (DER Japan 2021)". By holding this exhibition, it will be a powerful exhibition that disseminates global initiatives from both sides of "minimizing energy consumption" and "maximizing the use of clean energy" that will be required more and more in the future.

As GPSS Group, we will have our own booth for this event. GPSS Group is a company that invests in five sustainable energy power businesses, including solar, wind, small and medium hydro, geothermal, and biogas, as well as project development, investment management, engineering, and energy resource surveys, to realize a sustainable society.

Through our collaboration hand-to-hand with the local community, we value the sustainable energy of the abundant resources in the region and the return to the local community. By realizing a sustainable system, we are working every day to make society a sustainable cycle.

At our booth, we would like to introduce details such as development results, examples of regional collaboration, list of overseas partners and products, our way to achieve sustainability and ESG, etc.

Please feel free to drop in at our booth. We are looking forward to your visit.
